

ADITYA PANDEY

Software Engineer / Full Stack Developer

+919634593183 | adityapandey0456@gmail.com | [LinkedIn](#) | [GitHub](#)

Noida, Uttar Pradesh

PROFESSIONAL SUMMARY

BTech Computer Science graduate with hands-on experience in full-stack development, machine learning, and cloud technologies. Proficient in Java, MERN Stack, Python, and Microsoft Azure with experience in building scalable web applications, RESTful APIs, and ML-based solutions. Skilled in database optimization, API integration, and secure cloud deployment with a strong foundation in Data Structures, Algorithms, and software engineering principles.

RELEVANT EXPERIENCE

Freelancer – Grade-Up, Virtual

Apr 2025 – Present

- Spearheaded the delivery of 4 enterprise-grade web applications, integrating robust full-stack and cloud computing architectures.
- Architected RESTful APIs using Node.js and SQL, successfully handling 10,000+ daily queries and boosting system throughput by 30%.
- Trained Scikit-learn classification models that achieved 92% predictive accuracy, reducing manual data entry operations by 40%.
- Provisioned secure Microsoft Azure cloud infrastructure, deploying 5+ Virtual Machines with RBAC policies to ensure 99.9% uptime.
- Accelerated database performance by optimizing 20+ complex SQL queries, decreasing API response latency by a measurable 35%.

PROJECTS

Sign-Bridge AI: ISL Learning & Comm. Platform

Final Year Project | 2025–2026

- Programmed a real-time gesture desktop application processing video feeds at 30 FPS utilizing Python and OpenCV.
- Engineered a CNN recognition architecture that classified over 100 distinct hand signs with 95.5% testing accuracy.
- Consolidated 4 diverse multimodal modules (Text/Speech-to-Sign) into a unified platform, serving 50+ beta users.
- Constructed a lightweight Tkinter GUI, which reduced system memory overhead by 15% for seamless offline accessibility.
- Leveraged MediaPipe for continuous hand tracking, achieving sub-50ms latency during real-time sign detection.

D-Finance: Secure Fintech Routing & KYC Platform

Full-Stack Project | 2026

- Formulated a responsive React.js and Tailwind frontend backed by a Flask REST API supporting 500+ concurrent users.
- Constructed a hybrid Android application via Capacitor JS, writing native Java bridges to process hardware requests 20% faster.
- Automated a real-time KYC verification pipeline processing 100+ documents, eliminating manual fraud checks entirely.
- Secured session management using JWT and custom Axios interceptors, reducing token injection errors to strictly 0%.
- Orchestrated robust CORS configurations, resulting in zero vulnerabilities detected during penetration testing.

TECHNICAL SKILLS

Programming Languages

Java Python C JavaScript SQL

Frontend Technologies

React.js HTML5 CSS3 Tailwind

Backend Technologies

Node.js Express.js REST APIs

Databases

MongoDB MySQL

Machine Learning

Scikit-learn TensorFlow Keras OpenCV

Tools & Technologies

Git GitHub Azure AWS

Core Concepts

Data Structures Algorithms OOPs DBMS

EDUCATION

B. Tech – Computer Science

Hindustan College of Science & Tech

2022 - 2026 | CGPA: 7.0/10

Senior Secondary (XII)

Umanath Singh Higher Secondary

2022 | 80%

Secondary (X)

Umanath Singh Higher Secondary

2020 | 81%

CERTIFICATIONS

- SQL Certification – HackerRank | 2025
- SE Intern Certification – HackerRank | 2025
- Full Stack Web Dev Advanced – RCPL
- C with Data Structures – RCPL
- Python Basic to Advanced – Udemy
- Published research paper in ISJEM | Apr 2026
- Tech Head – Robotics Society
